

SALESGENIE AI

CRM Sync Service

Module 5 — Conversation Intelligence & CRM Integration

Kirti Chandra Nayak

Backend Developer · Team C

Team Task Chart · Day 22

Virtual Class Session

AGENDA

What I'll walk through today

01

Project Recap

Where CRM Integration fits inside SalesGenie AI

02

My Role & Scope

Backend developer responsibilities

03

Today's Key Task

CRM sync logic + sync logs

04

Backend Architecture

How contacts, activities & deal stages stay in sync

05

Tech Stack

VS Code · Python · FastAPI · Streamlit

06

Deliverable & Next Steps

The CRM Sync Service and what follows

Where this task sits in SalesGenie AI

5

Conversation Intelligence & CRM Integration

- Summarize sales calls, meetings, and customer interactions
- Extract key discussion points and action items
- Integrate with CRM platforms for activity synchronization

↳ Today's focus: CRM Sync Service (backend)

Backend Developer

BACKEND DEVELOPER

Keep SalesGenie AI and the CRM in sync

- Implement sync logic for contacts, activities & deal stages
- Write sync logs to track what was synced, when, and the result
- Handle conflicts and failed sync attempts gracefully
- Build on the FastAPI CRM integration endpoints
- Surface sync status in the Streamlit app

Implement CRM Sync Logic + Sync Logs

Contacts, activities, deal stages — backend implementation

1

Contact Sync

Keep prospect/customer contact records aligned between SalesGenie AI and the CRM.

2

Activity Sync

Push call summaries and action items into the CRM as logged activities.

3

Deal Stage Sync

Update deal / pipeline stage in the CRM as leads progress.

4

Sync Logs

Record every sync attempt — status, timestamp, and errors — for traceability.

How records stay in sync with the CRM

Tools I'm building this with

VS Code

Development environment for writing and organizing the backend codebase.

Python / FastAPI

Core language and framework for the sync engine and sync-log endpoints.

Streamlit

Front-end surface that displays sync status and logs.

DELIVERABLE

CRM Sync Service

What the backend delivers as part of Module 5

- **Contact sync logic** Keeps contact records aligned between SalesGenie AI and the CRM
- **Activity sync logic** Logs call summaries and action items as CRM activities
- **Deal stage sync logic** Updates pipeline / deal stage as leads move forward
- **Sync logs** Stores status, timestamp & errors for every sync attempt
- **Streamlit hookup** Dashboard view showing sync status and recent log entries

NEXT STEPS

Beyond Day 22

1

Handle sync conflicts

Define rules for when local and CRM records disagree

2

Add retry logic

Automatically retry failed syncs and log the outcome

3

Test sync scenarios

Validate contact, activity, and deal-stage sync end-to-end

4

Surface logs in Streamlit

Show recent sync activity and failures in the dashboard

Thank You
